The information automatically collected by Google technologies about your use of our website is usually transferred to a server of Google LLC, 1600 Amphitheatre Parkway Mountain View, CA 94043, USA and stored there. Unless otherwise specified for the specific technologies, data processing is based on an agreement concluded for the respective technology between jointly responsible parties in accordance with Art. 26 GDPR. Further information about data processing by Google can be found in [Google's privacy policy](#).

Our service providers are located and/or use servers in countries outside the EU and the EEA for which the European Commission has established by decision an adequate level of data protection.

Our service providers are located and/or use servers in countries outside the EU and the EEA. For these countries there is no adequacy decision by the European Commission. Our cooperation is based on standard data protection clauses adopted by the European Commission.

Google Analytics

For the purpose of website analysis, Google Analytics automatically collects and stores data (IP address, time of visit, device and browser information as well as information on your use of our website), from which usage profiles are created using pseudonyms. Cookies may be used for this purpose. If you visit our website from the EU, your IP address will be stored on a server located in the EU to derive location data and then deleted immediately before the traffic is forwarded to further Google servers for processing. The data processing is carried out on the basis of an order processing agreement by Google.

In order to optimize the marketing of our website, we have activated the **data sharing settings for "Google products and services"**. This allows Google to access the data collected and processed by Google Analytics and then use it to improve Google services. The data sharing to Google within the scope of these data sharing settings is based on an additional agreement between the data controllers. We have no influence on the subsequent data processing by Google.

For web analytics purposes, the extension function of Google Analytics **Google Signals** enables so-called "cross-device tracking". If your internet-enabled devices are linked to your Google Account and you have activated the "personalised advertising" setting in your Google Account, Google can

generate reports on your usage behaviour (in particular cross-device user numbers), even if you change your device. We do not process personal data in this respect; we only receive statistics based on Google Signals.

For web analytics and advertising purposes, the extension function of Google Analytics enables the so-called **DoubleClick cookie** to recognize your browser when visiting other websites. Google will use this information to compile reports about your website activities and to provide other services related to the use of the website.

Google Ads

For advertising purposes in the Google search results as well as on the websites of third parties, the so-called Google **Remarketing** Cookie is used when you visit our website, which automatically enables interest-based advertising through the collection and processing of data (IP address, time of visit, device and browser information as well as information on your use of our website), by means of a pseudonymous cookie ID and on the basis of the pages you visit. Any further data processing only takes place if you have activated the setting "personalised advertising" in your Google account. In this case, if you are logged into Google while visiting our website, Google will use your data together with Google Analytics data to create and define target group lists for cross-device remarketing.

For website analysis and event tracking, we use Google Ads **Conversion Tracking** to measure your subsequent usage behaviour when you arrive on our website via a Google Ads ad. For this purpose, cookies may be used and data (IP address, time of visit, device and browser information as well as information on your use of our website based on events specified by us, such as a visit to a website or newsletter registration) may be collected, from which usage profiles are created using pseudonyms.

Google reCAPTCHA

For the purpose of protection against misuse of our web forms as well as against spam by automated software (so-called bots), Google reCAPTCHA collects data (IP address, time of visit, browser information as well as information on your use of our website) and performs an analysis of your use of our website by means of a so-called JavaScript and cookies. In addition, other cookies stored in your browser by Google services are evaluated. Personal data is not read out or stored from the input fields of the respective form.

YouTube Video Plugin

In order to integrate third party content, data (IP address, time of visit, device and browser information) are collected via the YouTube Video Plugin in the expanded data protection mode used by us, transmitted to Google and then processed by Google only when you play a video.

7.2 Use of Microsoft services

We use the technologies of Microsoft Ireland Operations Ltd., One Microsoft Place, South County Business Park, Leopardstown, Dublin 18, D18 P521, Ireland (hereafter "Microsoft"). The data processing is carried out on the basis of an agreement between jointly responsible parties in accordance with Art. 26 GDPR. The information automatically collected by Microsoft technologies about your use of our website is usually transferred to a server of Microsoft Corporation, One Microsoft Way, Redmond, WA 98052-6399, USA and stored there. For more information about Microsoft's data processing practices, please see [Microsoft's privacy policy](#).

Our service providers are located and/or use servers in countries outside the EU and the EEA for which the European Commission has established by decision an adequate level of data protection.

Our service providers are located and/or use servers in countries outside the EU and the EEA. For these countries there is no adequacy decision by the European Commission. Our cooperation is based on standard data protection clauses adopted by the European Commission.

Microsoft Advertising

For advertising purposes in the Bing, Yahoo and MSN search results as well as on the websites of third parties, the so-called Microsoft Advertising **Remarketing** Cookie is used when you visit our website, which automatically enables interest-based advertising through the collection and processing of data (IP address, time of visit, device and browser information as well as information on your use of our website) and by means of a pseudonymous cookie ID and based on the pages you visit.

For website analytics and event tracking purposes, we use Microsoft Advertising **Universal Event Tracking** (UET) to measure your subsequent usage behavior when you arrive on our website via a Microsoft Advertising ad, from which usage profiles are generated using pseudonyms. For this purpose, cookies may be used and data (IP address, time of visit, device and browser information as well as information on your use of our website based on events specified by us, such as a visit to a website or newsletter registration) may be collected, from which user profiles are created using pseudonyms. As long as your Internet-enabled devices are linked to your Microsoft account and you have not disabled the "Interest-based Advertising" setting in your Microsoft account, Microsoft can generate reports on usage behavior (especially cross-device user numbers), even if you change your device, so-called "cross-device tracking". In this respect, we do not process personal data, we only receive statistics based on Microsoft UET.

7.3 Use of Facebook services

Use of Facebook Pixel

We use the Facebook pixel within the framework of the technologies of [Meta Platforms Ireland Ltd.](#), 4 Grand Canal Square, Dublin 2, Ireland (hereafter („Facebook (by Meta)" or "Meta Platforms Ireland") as described below. The Facebook pixel is used to automatically collect and store data (IP address, time of visit, device and browser information as well as information on your use of our website based on events specified by us, such as a visit to a website or newsletter registration), from which user profiles are created using pseudonyms. As part of the so-called advanced matching, information is also collected and stored hashed for matching purposes, with which individuals can be identified (e.g. names, e-mail addresses and telephone numbers). For this purpose, a cookie is automatically set by the Facebook pixel when you visit our website, which automatically enables recognition of your browser when visiting other websites by means of a pseudonymous cookie ID. Facebook (by Meta) will combine this information with other data from your Facebook account and use it to compile reports on website activities and to provide other services associated with website use, in particular personalised and group-based advertising. We have no influence on data processing by Facebook and only receive statistics based on Facebook pixels.

The information automatically collected by Facebook (by Meta) technologies about your use of our website is usually transferred to a server of Meta Platforms, Inc., 1 Hacker Way, Menlo Park, California 94025, USA and stored there. Further information about data processing by Facebook can be found in [Facebook's \(by Meta\) privacy policy](#).

Our service providers are located and/or use servers in the following countries, for which the European Commission has established an adequate level of data protection by decision: USA, Canada, Japan, South Korea, New Zealand, United Kingdom, Argentina. There is a decision of the European Commission on an adequate level of data protection for the USA as the basis for a third country transfer, insofar as the respective service provider is certified. Certification is available.

Our service providers are located and/or use servers in these countries: Australia, Hong Kong, India, Indonesia, Malaysia, Singapore, Thailand, Taiwan, Brazil, Mexico. There is no European Commission adequacy decision for this country/these countries. Our cooperation is based on these guarantees: Standard data protection clauses of the European Commission.

Facebook Analyses

As part of the Facebook business tools, statistics created via Facebook pixels about your use of our website enable us to analyse visitor activity on the website. The data processing is based on a data processing agreement with Facebook (by Meta). The analysis serves the optimal presentation and marketing of our website.

Facebook Ads (Ad manager)

We use Facebook Ads to promote this website on Facebook (by Meta) and other platforms. We determine the parameters of the respective advertising campaign. Facebook (by Meta) is responsible for the exact implementation, in particular the decision on the placement of the ads with individual users. Unless otherwise specified for the individual technologies, data processing is based on an arrangement between joint controllers in accordance with Art. 26 GDPR. The joint controllership is limited to the collection of data and its transmission to Meta Platforms Ireland. The subsequent data processing by Meta Platforms Ireland is not covered by this arrangement.

Based on the statistics about visitor activity on our website created via Facebook pixels, we operate group-based advertising on Facebook (by Meta) via Facebook **Custom Audience** by determining the characteristics of the respective target group. As part of the advanced matching (see above) that takes place to determine the respective target group, Facebook (by Meta) acts as our data processor.

On the basis of the pseudonym cookie ID used by the Facebook pixel and the collected data about your usage behavior on our website, we operate personalized advertising via Facebook Pixel **Remarketing**.

Via Facebook Pixel **Conversions** we measure your subsequent usage behavior for web analytics and event tracking purposes if you have reached our website via a Facebook Ads ad. The data processing is based on a data processing agreement with Facebook (by Meta).

8. Integration of the Trusted Shops Trustbadge / other widgets

Provided that you have given your consent in accordance with Art. 6 (1) (a) GDPR, Trusted Shops widgets are integrated on this website to display the Trusted Shops services (e.g. Trustmark, collected reviews) and to offer buyers Trusted Shops products after they have placed an order.

The Trustbadge and the services advertised with it are an offer of Trusted Shops AG, Subbelrather Str. 15C, 50823 Cologne ("Trusted Shops"), with whom we are jointly responsible for data protection according to Art. 26 GDPR. Within the scope of this data protection notice, we inform you in the following about the essential contractual contents in accordance with Art. 26 (2) GDPR.

Within the framework of the joint responsibility existing between us and Trusted Shops AG, please preferably contact Trusted Shops using the contact options provided in the [privacy policy](#), if you have any data protection questions and wish to assert your rights. Irrespective of this, however, you can always contact the person responsible of your choice. Your enquiry will then, if necessary, be passed on to the other person responsible for a response.

8.1 Data processing when integrating the Trustbadge/other widgets

The Trustbadge is provided by a US-American CDN provider (content delivery network). An adequate level of data protection is ensured by an adequacy decision of the EU Commission, which can be accessed [here](#) for the USA. Service providers from the USA are generally certified under the EU-U.S. Data Privacy Framework (DPF). Further information is available [here](#). Where service providers are not certified under the DPF, standard contractual clauses have been concluded as a suitable guarantee.

When the Trustbadge is called up, the web server automatically saves a so-called server log file, which also contains your IP address, the date and time of the call-up, the amount of data transferred and the requesting provider (access data) and the call-up. Immediately after the data collection the IP address is anonymised so that the stored data cannot be assigned to you personally. The anonymised data are used in particular for statistical purposes and for error analysis.

8.2 Data processing after order completion

Provided you have given your consent, the Trustbadge accesses order information stored in your terminal equipment (order total, order number, product purchased if applicable) and your e-mail address after the order has been completed. Your e-mail address is hashed using a cryptological one-way function. The hash value is then transmitted to Trusted Shops with the order information in accordance with Art. 6 (1) (a) GDPR.

This serves to verify whether you are already registered for Trusted Shops services. If this is the case, further processing will take place in accordance with the [contractual agreement](#) between you and Trusted Shops. If you are not yet registered for the services or do not give your consent to automatic recognition via the Trustbadge, you will subsequently be given the opportunity to register manually for the use of the services or to conclude the insurance as part of your possibly already existing user contract.

For this purpose, the Trustbadge accesses the following information stored in the terminal equipment you use after you have completed your order: Order total, order number and email address. This is necessary so that we can offer you buyer protection. The data is only transmitted to Trusted Shops if you explicitly decide to take out buyer protection by clicking on the correspondingly designated button in the so-called Trustcard. If you decide to use the services, further processing is based on the contractual agreement with Trusted Shops in accordance with Art. 6 (1) (b) GDPR, in order to be able to complete your registration for buyer protection and insure the order, as well as to be able to subsequently send you rating invitations by e-mail if necessary.

Trusted Shops uses service providers in the areas of hosting, monitoring and logging. The legal basis is Art. 6 (1) (f) GDPR for the purpose of ensuring trouble-free operation. Processing may take place in third countries (USA and Israel). An adequate level of data protection is ensured in each case by an adequacy decision of the EU Commission, which can be accessed [here](#) for the USA and [here](#) for Israel. Service providers from the USA are generally certified under the EU-U.S. Data Privacy Framework (DPF). Further information is available [here](#). Where service providers are not certified under the DPF, standard contractual clauses have been concluded as a suitable guarantee.
